Amendments to the Specification

Please amend the specification under the provisions of 37 C.F.R. §1.121 (revised amendment format) as indicated below, with added matter indicated by underlining.

On page 10, please amend the first paragraph between lines 17-24 as follows:

-- (A) p27 (+/+), p27 (+/-) and p27 (-/-) mice were injected with rapamycin (4 mg/kg/day) for 5 days. The aortas were explanted, and migration of SMC was quantified and is presented as the rapamycin-mediated inhibition of migration as a % of control. Rapamycin significantly inhibited migration in both p27 (+/+) and p27 (+/-) SMC; rapamycin had no effect on p27 (-/-) SMC explant migration.
